

ATLAS Export Integration.

Super-Automated filing with PRECISION Global Trade Management (GTM).

Since August 2006, ATLAS Export, the electronic customs filing system of the German Federal Customs Administration has existed under voluntary participation. However, starting in July of 2009 the German government has officially stated that electronic declarations will become mandatory.

Many organizations will realize the high degree of coordination required between their customs and logistics processes. Indeed, the need for a closely integrated system to handle the seamless transaction of the necessary data will become paramount in order to keep export shipments moving smoothly.

Challenge Met. Value Realized.

You can meet that challenge without breaking stride with Precision's ATLAS Integration, the automated solution for accurate export filing, a feature of PRECISION GTM. With PRECISION you can:

- ❖ Ensure seamless connectivity to ATLAS with a certified integration
- ❖ Gain export process improvements using our workload manager and messaging infrastructure
- ❖ Reduce shipment cost and time with automated self-filing
- ❖ Save valuable resource time by minimizing data entry and filing tasks
- ❖ Maintain on-time deliveries with compliant data – catch errors early in the process so your goods don't get held in customs

Act Now!

Ensure that your customs and logistics processes are in sync with PRECISION's ATLAS Integration. Call us today 312 334 8600 or email info@precisionsoftware.com for more information.

"PRECISION GTM is the perfect solution to automate the ATLAS AES process in our high-volume export shipping environment. With ATLAS Integration, data integrity and shipment cycle times are just two of the areas that are positively impacted by the PRECISION solution."

Miguel Jimenez, W.L. Gore & Associates

Precision Software is certified by the German Federal Customs Administration for ATLAS AES 1.0 EXP.

Key Features

- **Pull filing data seamlessly from your existing ERP system to eliminate redundant data entry or errors**
- **Automatically calculate and validate commodity code totals and shipment values**
- **Pre-validate hundreds of ATLAS business rules as per German Customs specifications**
- **File export declarations and receive ATLAS customs replies. Messages are linked using the MRN number generated by ATLAS.**
- **Automatically receive customs documents from the ATLAS system (as document imaging)**
- **ATLAS error information and shipment status is automatically interfaced into the system**
