The PRECISION suite of collaborative supply chain solutions provides integrated process driven capabilities from a single platform and includes:

PRECISION Transportation Management
PRECISION Global Trade Management
PRECISION Trade Compliance
PRECISION Parcel Exception Management

TARGET MARKET

Importers, exporters, domestic shippers, transportation providers and business services companies.

CORPORATE VISION

The company's stated vision is to enable organizations to optimally manage their global supply chains and trade with precision.

Precision Software is unique in the marketplace with its origins in international trade and organic product development strategy upon which the PRECISION suite of solutions has been built. The suite offers an integrated platform for global trade management, transportation management, multi-carrier parcel and desktop shipping and supply chain visibility that enables companies to move goods throughout their domestic and global logistics operations.

Based on a Service Oriented Architecture platform, the PRECISION suite allows for simple integration with existing enterprise resource planning (ERP), warehouse management system (WMS) and legacy systems.

The PRECISION suite is valued for its business process driven design and helps companies to reduce costs, avoid delays at trans-border crossings, and mitigate risks associated with global trade.

Precision Software's customers span multiple verticals including life sciences, consumer packaged goods, retail, industrial products, food & beverage, 3rd party logistics providers and freight forwarding. They benefit from the company's 26 years of global trade and transportation experience and collaborative customer focused culture.

Precision Software is a wholly owned division of QAD Inc. (NASDAQ: QADI) a leading provider of enterprise applications for global manufacturing companies.
